Jerimiah,

Thank you again for the informative discussion yesterday. We gained a better understanding of the State's approach, as well as its concerns regarding the citation of detection limits in the scope of work. Given the absence of any specificity in this regard, attached please find suggested language that we believe will enhance the transparency of the process to be used by the State and, thereby, make the reports more scientifically defensible. Since the reports will not undergo public or formal scientific review, we believe such information is especially important to include in the reports.

Please let us know your thoughts. We look forward to our meeting tomorrow.

Thanks,

Howard
